

Recall Summary – European Toys

EU Safety Gate Alerts (Feb 2023)

Alert No.	Notifying Country	Product	Product Photo	Hazard/ Risk	Measures Adopted
A11/00021/23	Poland	Soft toy (Country of Origin: China)		Choking, Suffocation The foam filling material of the toy is easily accessible as some of the cover's seams may break. A small child may put the filling material in the mouth and choke on it. Moreover, the plastic of the packaging is too thin. If a child plays with the packaging, the plastic can cover the mouth and nose, causing the child to suffocate. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Warning consumers of the risks
A11/00022/23	Croatia	Soft toy (Country of Origin: China)		Choking The fibrous stuffing material of the toy is easily accessible due to the weaknesses of certain seams. A small child may put the stuffing material in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Ban on the marketing of the product and accompanying measures
A11/00023/23	Latvia	Stroller (Country of Origin: The Netherlands)		Injuries The seat structure and a wheel of the stroller break easily so that the stroller can collapse and injure a child. The product does not comply with the requirements of the General Product Safety Directive or with the European standard EN 1888-1.	Informing and giving instructions
A11/00025/23	Croatia	Soft toy (Country of Origin: Türkiye)		Choking Small parts may become detached. Also, the fibrous stuffing is accessible. A child may put any of these in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Destruction of the product

A11/00026/23	Poland	Plastic toy (Country of Origin: China)		Cuts The ball surface and bottom of the cones have rough edges which can cause cuts to a user. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Warning consumers of the risks
A12/00218/23	Germany	Baby carrier (Country of Origin: China)		Injuries The carrier has an inadequate attachment system which means that a baby may slip out of the carrier, fall and suffer injuries. The product does not comply with the requirements of the General Product Safety Directive or with the European standard EN 13209-2.	Removal of this product from the listing by the online marketplace
A12/00226/23	Czechia	Plastic doll (Country of Origin: China)		Chemical The plastic material of the head of the doll has an excessive concentration of bis (2-ethylhexyl) phthalate (DEHP) (measured value up to 21,2% by weight). This phthalate may harm the health of children, possibly causing damage to their reproductive systems. The product does not comply with the REACH Regulation.	Withdrawal of the product from the market
A12/00230/23	Italy	Plastic book (Country of Origin: China)		Chemical The plastic material of the product has an excessive concentration of bis (2-ethylhexyl) phthalate (DEHP) (measured value up to 2.2% by weight). This phthalate may harm the health of children, possibly causing damage to their reproductive systems. The product does not comply with the REACH Regulation.	Ban on the marketing of the product and accompanying measures
A12/00231/23	Italy	Children's bag (Country of Origin: China)		Chemical The plastic material of the product has an excessive concentration of bis (2-ethylhexyl) phthalate (DEHP) (measured value up to 10.2% by weight). This phthalate may harm the health of children, possibly causing damage to their reproductive systems. The product does not comply with the REACH Regulation.	Ban on the marketing of the product and accompanying measures

A12/00250/23	Poland	Plastic toy (Country of Origin: China)		Choking A small part (knob with metal rod) may be easily detached from the toy. A child may put the small part in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Withdrawal of the product from the market
A12/00255/23	Ireland	Inflatable children's costume (Country of Origin: China)		Burns, Fire, Injuries The product is flammable and may catch fire and cause a fire if worn close to a flame. A user and/or bystander may receive burns and injuries. The product does not comply with the requirements of the Toy Safety Directive.	Recall of the product from end users
A12/00264/23	Poland	Pull-along toy (Country of Origin: China)		Choking Small parts (plastic blocks) may easily detach. A small child may put them in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Small parts posing risk of choking to be removed from the toy
A12/00265/23	Poland	Toy gun set (Country of Origin: China)		Choking, Cuts, Damage to sight The suction cups of the projectiles can be easily detached. A child can put them in the mouth and choke. Moreover, the protective glasses break easily, generating sharp edges which may cause cuts or eye injuries. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Warning consumers of the risks
A12/00267/23	Poland	Rattle toy (Country of Origin: Belarus)		Choking The toy has protruding parts (handles). A child could put these into the mouth, which could block the airway and cause choking. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Warning consumers of the risks

A12/00268/23	Finland	Toy tractor (Country of Origin: China)		Choking Small parts (a small wheel and the axle) may easily detach. A child may put them in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Stop of sales
A12/00275/23	Latvia	Magnetic toy (Country of Origin: China)		Choking, Injuries The toy is made of small parts (balls) with a high magnetic flux. If a child swallows them, they could attract one another causing intestinal blockage or perforation. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Withdrawal of the product from the market
A12/00283/23	Slovakia	Modelling clay (Country of Origin: China)		Chemical The migration of boron from the modelling clay is too high in all available colours of the product (measured values up to 2234 mg/kg). Ingestion or contact with an excessive quantity of boron may harm the health of children by damaging their reproductive systems. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-3.	Recall of the product from end users
A12/00286/23	France	Children's balance bike (Country of Origin: China)		Chemical The dark leatherette of the handles contains DEHP and DINP (measured values up to 14.87% and 1.23% by weight, respectively). These phthalates may harm the health of children, possibly causing damage to their reproductive systems and livers. The product does not comply with the REACH Regulation.	Recall of the product from end users
A12/00288/23	Romania	Puffer toy (Country of Origin: China)		Choking Small parts (spikes) may easily detach from the toy. A small child may put them in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive or with the European Standard EN 71-1.	Withdrawal of the product from the market

A12/00294/23	Austria	Sleeping bag (Country of Origin: Unknown)		Strangulation The sleeping bag bears long functional cords with free ends. These cords can become trapped while a child is sleeping, possibly causing strangulation. The product does not comply with the requirements of the General Product Safety Directive or with the European standard EN 16781.	Recall of the product from end users
A12/00295/23	Austria	Sleeping bag (Country of Origin: Unknown)		Strangulation The sleeping bag bears long functional cords with free ends. These cords can become trapped while a child is sleeping, possibly causing strangulation. The product does not comply with the requirements of the General Product Safety Directive or with the European standard EN 16781.	Recall of the product from end users
A12/00303/23	The Netherlands	Children's cot (Country of Origin: Poland)		Injuries, Suffocation The distance between the slats on the side is too wide. A child may get stuck between two slats and suffocate. Furthermore, there is a material imperfection on the cot's corner and the strength of the cot base is inadequate. A child may become injured by the corner, or if the cot base breaks. The product does not comply with the requirements of the General Product Safety Directive or with the European standard EN 716-1.	Recall of the product from end users
A12/00304/23	France	Electric balance bike for children (Country of Origin: China)		Chemical, Injuries The plastic parts of the handles contain DEHP, DIBP and DINP (measured values up to 9.71%, 0.32% and 0.36% by weight, respectively). These phthalates may harm the health of children, possibly causing damage to their reproductive systems and livers. Furthermore, the toy reaches a speed that is too high (measured values: up to 10.36 km/h) and has an inadequate braking capacity, which creates a risk of accident. The product does not comply with the REACH Regulation or with the requirements of the Toy Safety Directive.	Recall of the product from end users

A12/00313/23	Greece	Plastic doll (Country of Origin: China)		Chemical The plastic material of the product has an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP) and dibutyl phthalate (DBP) (measured values up to 15.7 % and 0.48% by weight, respectively). These phthalates may harm the health of children, possibly causing damage to their reproductive systems. The product does not comply with the REACH Regulation.	Withdrawal of the product from the market
A12/00314/23	Finland	Soft toy (Country of Origin: China)		Chemical, Choking The soft toy has a small part (suction cup) that may easily detach. A child may put it in the mouth and choke. Moreover, the plastic material of the suction cup contains an excessive concentration of dibutyl phthalate (DBP) (measured value up to 8.9% by weight). This phthalate may harm the health of children, possibly causing damage to their reproductive systems. The product does not comply with the REACH Regulation, or with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Destruction of the product
A12/00315/23	Finland	Soft toy with keychain (Country of Origin: China)		Choking The soft toy has a small part (dog's nose) that may easily detach. A child may put it in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Import rejected at border
A12/00316/23	Finland	Soft toy (Country of Origin: China)		Choking The toy has small parts (eyes) and fibrous stuffing material which is easily accessible. A child may put this in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Destruction of the product

A12/00317/23	Finland	Soft toy (Country of Origin: China)		Chemical, Choking The toy has a small part (suction cup) and fibrous stuffing material that may easily detach. A child may put this in the mouth and choke. The plastic material of the suction cup contains an excessive concentration of Di(2-ethylhexyl)phthalate (DEHP) (measured value up to 40 % by weight). This phthalate may harm the health of children, possibly causing damage to their reproductive systems. The product does not comply with the REACH Regulation, or the requirements of the Toy Safety Directive, or the European standard EN 71-1.	Destruction of the product
A12/00318/23	Finland	Soft toy (Country of Origin: China)		Chemical, Choking The toy has a small part (suction cup) and fibrous stuffing material that can easily detach. A child may put it in the mouth and choke. The plastic material of the suction cup contains an excessive concentration of dibutyl phthalate (DBP) (measured value up to 10 % by weight). This phthalate may harm the health of children, possibly causing damage to their reproductive systems. The product does not comply with the REACH Regulation, or the requirements of the Toy Safety Directive, or the European standard EN 71-1.	Destruction of the product
A12/00319/23	Finland	Soft toy (Country of Origin: China)		Choking The toy has small parts (eyes) that may easily detach. Children may put them in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Destruction of the product
A12/00320/23	Germany	Baby carrier (Country of Origin: China)		Injuries Due to the insufficient attachment options on the baby carrier, the support is inadequate and the baby may slip out of the carrier. The baby may fall and suffer injuries. The product does not comply with the requirements of General Product Safety Directive or with the European standard EN 13209-2.	Recall of the product from end users

A12/00321/23	Poland	Toy bow and arrows set (Country of Origin: China)		Choking, Damage to sight The suction cups of the projectiles and arrows can easily detach. A child could put them in the mouth and choke. It is also possible to shoot arrows without the suction cups, and such arrows can hit the eye and cause serious injury. The product does not comply with the requirements of the Toy Safety Directive or the relevant European standard EN 71-1.	Warning consumers of the risks
A12/00330/23	France	Toy crossbow set (Country of Origin: Germany)		Injuries The product can shoot projectiles with excessive kinetic energy, which can cause injuries, especially to the eyes. The product does not comply with the requirements of the Toy Safety Directive, or with the European standard EN 71-1.	Withdrawal of the product from the market
A12/00334/23	Finland	Soft toy (Country of Origin: Unknown)		Choking The toy contains small parts (plastic eyes) that may easily detach. Children may put them in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Withdrawal of the product from the market
A12/00335/23	Malta	Fancy dress (Country of Origin: Unknown)		Strangulation The product has a long functional cord in the neck area which can become trapped during various activities of a child and possibly cause strangulation. The product does not comply with the requirements of the General Product Safety Regulation.	Recall of the product from end users
A12/00342/23	France	Toy soap (Country of Origin: United States)		Choking The chef's hat of the duck protrudes. A child can put it in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Withdrawal of the product from the market

A12/00344/23	Belgium	Magnet building set (Country of Origin: China)		Choking, Injuries The product contains small parts (metal rods and balls). A child may put them in the mouth and choke. Furthermore, the magnetized metal rods exceed the maximum permitted magnetic flux value (102.5 kG.mm ²). If various items are swallowed, they could attract one another, causing intestinal blockage or perforation. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Recall of the product from end users
A12/00345/23	France	Toy xylophone (Country of Origin: China)		Choking Small parts (red ball from the mallet, feet from the xylophone) are easily detached. Children may put them in the mouth and choke. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-1.	Recall of the product from end users
A12/00346/23	Italy	Modelling clay (Country of Origin: China)		Chemical The migration of boron from the modelling clay is too high in all available colours of the product (measured values up to 2250 mg/kg). Ingestion or contact with an excessive quantity of boron may harm the health of children by damaging their reproductive systems. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-3.	Ban on the marketing of the product and accompanying measures
A12/00349/23	Greece	Plastic doll (Country of Origin: China)		Chemical The plastic material of the head of the doll has an excessive concentration of bis (2-ethylhexyl) phthalate (DEHP) (measured value up to 34% by weight). This phthalate may harm the health of children, possibly causing damage to their reproductive systems. The product does not comply with the REACH Regulation.	Withdrawal of the product from the market

A12/00352/23	Germany	Baby carrier (Country of Origin: China)		Injuries Due to the inadequate attachment options on the baby carrier, the support is insufficient and the baby may slip out of the carrier, fall and suffer serious injuries. The product does not comply with the requirements of General Product Safety Directive.	Recall of the product from end users
A12/00377/23	Luxembourg	Electric balloon puncher toy (Country of Origin: China)		Chemical The product releases an excessive amount of nitrosatable substances (measured value up to 4.8 mg/kg) which can be converted into nitrosamines, which are genotoxic carcinogens via inhalation, ingestion or dermal exposure. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-12.	Non-compliant balloons will be replaced by new compliant ones sent by SILVERLIT the retailers in LU.
A12/00378/23	Latvia	Children`s cot (Country of Origin: Poland)		Entrapment, Injuries, Suffocation The distance between the slats is too wide. A child may get stuck with its head or with a limb between two slats, and become entrapped and possibly suffocate. Furthermore, the product is not sufficiently stable and resistant, and may break or tip over. Consequently, a user may become injured. The product does not comply with the requirements of the General Product Safety Directive or with the European standard EN 716-1.	Withdrawal of the product from the market
A12/00379/23	Latvia	Children`s cot (Country of Origin: Poland)		Entrapment, Injuries, Suffocation The distance between the slats on the side is too large. A user may get a limb stuck between two slats, remain entrapped and possibly suffocate. Furthermore, the product is not sufficiently stable and resistant, and may break or tip over. Consequently, a user may receive injuries. The product does not comply with the requirements of the General Product Safety Directive or with the European standard EN 716-1.	Withdrawal of the product from the market

A12/00380/23	Latvia	Children`s cot (Country of Origin: Poland)		Entrapment, Injuries, Suffocation The distance between the slats on the side is too large. A child may be entrapped between two slats and possibly suffocate. The product is not sufficiently stable or resistant and may break or tip over. A user may be injured. The product does not comply with the requirements of the General Product Safety Directive or with the European standard EN 716-1.	Withdrawal of the product from the market
A12/00387/23	France	Balloons (Country of Origin: China)		Chemical The product releases an excessive amount of nitrosatable substances (measured value up to 2.9 mg/kg). Nitrosatable compounds can be converted into nitrosamines, which are genotoxic carcinogens via inhalation, ingestion or dermal exposure. A child can get exposed to them by putting the product in the mouth. The product does not comply with the requirements of the Toy Safety Directive or with the European standard EN 71-12.	Recall of the product from end users
INFO/00006/23	France	Bath toy (Country of Origin: India)		Chemical The toy releases an excessive amount of bisphenol A (measured value up to 0.2 mg/l). Bisphenol A has endocrine disrupting properties and affects the mammary glands, reproductive and immune systems and may impair the brain's development and create adverse behavioural outcomes in children. The product does not comply with the requirements of the Toy Safety Directive.	No measures yet taken

Safety Gate: the EU rapid alert system for dangerous non-food products

“Safety Gate”, the EU rapid alert system (formerly known as ‘RAPEX’), enables the rapid exchange of information between **31 European countries** and the European Commission on non- food dangerous products found on the market posing a risk to the health and safety of consumers.

A weekly overview of the alerts on those products is published in English for free on <https://ec.europa.eu/safety-gate-alerts/screen/webReport#weeklyReports>. The measures taken in the notifying country in order to restrict such products’ marketing or use can be ordered by national authorities ("compulsory measures") or be taken directly by producers and distributors ("voluntary measures").

The official contact points of the Member and EFTA-EEA States provide the information published in these weekly overviews. Under the terms of Annex II.10 of the General Product Safety Directive (**2001/95/EC**) responsibility for the information provided lies with the notifying party. The Commission does not take any responsibility for the accuracy of the information provided.

Recall Summary – US Toys / Children’s Products

CPSC Recall List (Feb 2023)

Recall No.	Notifying Country	Product	Product Photo	Hazard/ Risk	Remedy
23-109	USA	Children’s pajamas (Country of Origin: Peru)		Burn Hazard Paper Cape Recalls Children’s Pajamas Due to Violation of Federal Flammability Standards and Burn Hazard The recalled children’s pajamas fail to meet the federal flammability standards for children’s sleepwear, posing a risk of burn injuries to children.	Consumers should immediately take the recalled children’s pajamas away from children, stop using them and contact Paper Cape for a full refund or a refund in the form of store credit for the original purchase price + 10%. CPSC

The United States Consumer Product Safety Commission (CPSC) is an independent agency of the United States government. To provide better service in alerting the American people to unsafe, hazardous or defective products, a “one stop shop” for U.S. Government recalls, <http://www.recalls.gov>, has been created. Members of the public may report unsafe products to CPSC by using the platform.

The recall list is divided into seven categories: Consumer Products, Motor Vehicles, Boats, Food, Medicine, Cosmetics and Environmental Products. Generally, the recall is conducted voluntarily by the company under CPSC’s Fast Track Recall program. Fast Track recalls are initiated by firms who are committed to working with CPSC to quickly announce the recall and remedy to protect consumers.

Recall Summary – Australia Toys / Children’s Products

ACCC Recall List (Feb 2023)

PRA No.	Notifying Country	Product/ Description	Product Photo	Hazard/ Risk	Remedy
2023/19703	Australia	<p>Two piece clothing set with a red wavy printed top with small pompoms along the neck and larger pompoms above the front hem, and red leggings with larger pompoms above the leg opening. Australian Product Safety System

The Australian product safety system is to maximize the safety of good by the cooperation of consumers, businesses and agencies. This policy sets out the principles adopted by the Australian Competition and Consumer Commission (ACCC) for prioritizing and addressing product safety risks.

Under the Australian Consumer Law, a responsible Minister can order a compulsory recall when there are hazards on the products. A voluntary recall could be conducted to remove the product from the marketplace when the suppliers become aware of unsafe or defective products.

The ACCC administers a national recalls system for recalls of specific and general consumer products, and publishes all product recalls on the website <https://www.productsafety.gov.au/recalls>.

STC (Hong Kong Standards and Testing Centre) is a not-for-profit, independent testing, inspection and certification organization. With a global network of ISO/IEC 17025 accredited testing laboratories and 60 years of experience in consumer product testing, we can meet your conformity assessment needs with our highly efficient and reliable service. Our testing scope and capabilities related to toys and children's products include inter alia the following:
