

EN 14120 Protective Guards Testing Service

The safety of protective guards for wrists, palms, knees and elbows have always been the highest concern of consumers. In recent years, there have been occasional product recalls for such related products. With a professional engineering team and state-of-the-art testing equipment, **STC has developed comprehensive EN 14120 standard testing services for roller skating protective gears**, providing your products with the highest quality and safety assurance to enter the European market.
