

# Children's Bicycle Testing

**50% OFF**

Are your children's bicycles **safe** for sale and use?

Children's bicycles, with a rear wheel propulsion mechanism and seat height of 435 - 635 mm, are designed for kids aged 4 - 8 years. There are various bike designs and wheel diameters. Bikes may or may not come with training wheels. Find out how safe your bike is with the **STC Children's Bicycle Testing service, accredited by CNAS & CPSC.**

Country/Region	Standard	Scope of Standard
USA	16 CFR 1512	<ul style="list-style-type: none"> <li>• Applicable to bicycles for children and adults.</li> <li>• Testing for children's bicycles include: structure and materials testing for the strength and safety of the bike frame, seat, braking system, tires, and other components; braking distance test; and chain strength test.</li> </ul>
China	GB 14746-2006	<ul style="list-style-type: none"> <li>• Applicable to bicycles for children and adults.</li> <li>• Children's bicycles that meet the requirements of this standard are not toy bicycles. Therefore, they do not fall into the scope of requirements for toy safety.</li> <li>• This standard does not apply to children's bicycles used for stunt riding.</li> </ul>
