

WELL EQUIPPED WITH NEWLY REGULATORY TEST SYSTEM FOR WIRELESS DEVICES

With today's devices often promising to connect anyone, anywhere at any time, both buyers and suppliers must rely on a trusted partner like STC to ensure their devices not interfere with other wireless devices or allow those others to interfere with it around the world.

- ▶ Compliance tests under ETSI EN300328 /ETSI EN301893 for the 2.4/5 GHz band
- ▶ Coverage of all test cases from the ETSI/FCC standards
- ▶ Support for frequency hopping and MIMO devices with up to eight antenna ports, e.g. Bluetooth 5.0 and WiFi 6
- ▶ Automatic measurements based on radio technology selected

STC offers the following benefits :

- ▶ Pre-test / walk-in services to improve your product at initial stage
- ▶ Full test with certification to expedite your products to market
- ▶ Quick answers to your technical questions
- ▶ Fast turnaround to accelerate your time to revenue

Please contact us while we can help you to provide insight into your testing challenges.
