

抗新冠病毒物料測試 Anti-virus (SARS-CoV-2) Materials Testing

如何證明您的產品可以抵禦 COVID-19
To Prove whether Your Products
can Safeguard Against COVID-19

自 2019 年底出現了 COVID-19，該病毒正在影響全球。戴口罩和保持良好衛生習慣是大多數人保護自己免受病毒感染。很多市民已經注射疫苗，雖能減低出現重症機會，但未能有效完全阻止病毒感染。

最新研究顯示，變種病毒 Omicron 存活時間達數小時甚至數天。如能驗證產品對於新型冠狀病毒 SARS-CoV-2 (COVID-19) 的抗菌能力，這正是一個關鍵因素。

COVID-19 has been emerged since late 2019 and the virus is affecting everyone all over the world. Wearing face masks and implementing good hygiene practices are what most people do to protect themselves against the virus. In fact, many of us are vaccinated, which can lower the risk of serious illness, but still it can't completely prevent us from contracting the virus.

Latest studies reveal that the Omicron Variant can survive on object surfaces for hours and even for days; therefore, it is crucial to prove the products can kill or eliminate the virus effectively.

STC 與合作夥伴提供這項測試服務，產品範圍涵蓋：

STC works closely with our partners to provide this testing service covering:

- 塗層織物
Coated Fabric
- 塑料
Plastic
- 玻璃
Glass
