### **STC Participates in Germany's Nuremburg International Toy Fair 2024**

**[30 January 2024, Nuremburg, Germany]** A team of experts from Hong Kong Standards and Testing Centre participates in Nuremburg International Toy Fair 2024 from 30 January to 3 February 2024. The fair has attracted over 2,300 exhibitors from more than 60 countries and regions around the world.

“We are pleased to be here again,” said Mr. Johnny WONG, General Manager of STC’s Toys and Children’s Products Department. “And we look forward to taking this opportunity to further expand our international market and introduce STC’s leading-edge testing capabilities to more manufacturers and buyers of toys and children’s products.”

During the first day, many domestic and global manufacturers and buyers enquired about STC’s testing services for toys and children’s products, as well as the latest international standards and safety regulations. STC’s veteran experts explained the latest developments in STC’s toys and children’s product testing services.

In recent years, STC has expanded its testing scope from traditional toys and children’s products to include sports products for children, such as bicycles and helmets. Additionally, STC (Vietnam) was included in the “Recognised List of Overseas Testing Agencies” by the Japanese government in 2023, becoming the first registered toy testing laboratory in Haiphong, Vietnam recognised by the Japanese government for testing toys and children’s products intended for the Japanese market.

STC has an excellent national and international reputation as a testing, inspection and certification organisation that can test toy products according to international standards. Its test reports are widely recognised by certification bodies from many countries, including China’s CMA, CNAS and CNCA; Vietnam’s VILAS, BoA; Japan’s MHLW, JTA and CPSA; and the United States’ CPSC and PJLA.

STC will continue broadening its testing scope and striving to expand recognition to provide increasingly convenient and efficient testing services for toy manufacturers from more countries. For more details about STC’s toys and children’s product testing services, please contact STC.

## About STC

Established in 1963, Hong Kong Standards and Testing Centre (STC) is an independent, not-for-profit organisation, providing over 60 years of testing, inspection, and certification expertise. It offers a wide range of conformity assessment services for myriad products including Toys, Children's Products, Textiles, Apparel, Footwear, Furniture, Electrical and Electronic Products, Food, Chemical and Pharmaceutical Products, and Medical Devices, as well as Rail Transit and Automotive Parts. To meet the growing global demand for testing and certification services, not only has STC set up cutting-edge testing laboratories and offices in China's major regions, such as Guangdong, Shanghai, Changzhou and Guangxi, but it has also established offices and testing laboratories in Vietnam, Japan, the USA and Germany. Simultaneously, STC is expanding its business scale to offer comprehensive, professional testing and inspection services to clients from all sectors.
