

# What is **EN 1090** Certification?

**Steel (and aluminium) structure EN 1090 certification** refers to the **CE certification** of steel (and aluminium) structures. It is an assessment of the quality control capabilities of steel (and aluminium) structure manufacturing companies. **Products with a CE mark indicate that they comply with safety, hygiene, and environmental protection, etc.**

The **EN 1090** standard specifies the requirements for the use of steel (and aluminium) structures to ensure that steel (and aluminium) structures have **sufficient mechanical resistance, stability, usability, and durability.**
