

Recall Summary – European Toys

EU Safety Gate Alerts (May 2024)

Alert No.	Notifying Country	Product	Product Photo	Hazard / Risk	Measures Adopted
A11/00060/24	Poland	Toy scooter (Country of Origin: China)		Injuries The front wheels are too small and could get stuck in holes in the ground. This could cause the child to lose balance and fall off, leading to injuries. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Warning consumers of the risks
A11/00061/24	Denmark	Toy gun set (Country of Origin: China)		Choking, Injuries The toy can launch the projectile or an improvised projectile with excessive kinetic energy, causing injury to a person in the path of that projectile, with a particular risk of eye damage. Moreover, the gel beads can be put into a small child's mouth and swallowed. As the beads expand, they can cause fatal occlusion of the respiratory track. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
A12/01032/24	France	Soft toy (Country of Origin: China)		Choking The toy contains small parts (eyes), which can easily detach. As a consequence, a small child may put them in their mouth and choke. In addition, the red and yellow segments can easily detach and the fibrous material becomes easily accessible. A child may put it in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Warning consumers of the risks

A12/01034/24	France	Keyring with soft toy (Country of Origin: China)		Choking Small parts (metal ring, chain, eyes, nose) may easily detach from the product. The seam allows access to the stuffing material. A small child may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Removal of this product listing by the online marketplace
A12/01062/24	France	Toy gun (Country of Origin: China)		Injuries The kinetic energy of the ejected plastic parts (purple plastic projectiles) is too high. This can cause injuries, especially to the face and eyes. Improvised projectiles, such as pencils or pen cartridges can also be fired in a dangerous manner, which can also cause injuries. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
A12/01084/24	France	Soft toy (Country of Origin: China)		Choking Small parts (right eye) may easily detach from the toy. The seam allows access to the stuffing material. A small child may put these items in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
A12/01103/24	France	Nesting toy dolls (Country of Origin: China)		Choking The toy has small parts (smallest cat figure). A small child may put it in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
A12/01107/24	France	Soft toy (Country of Origin: China)		Choking The toy contains small parts (plastic eyes) which can easily detach. As a consequence, a small child may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Warning consumers of the risks

A12/01133/24	France	Eraser (Country of Origin: China)		Choking The product lacks the appropriate age warning, therefore a small child could be given the toy, put it in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive and the relevant European standard EN 71-1.	Warning consumers of the risks
A12/01139/24	Lithuania	Rattle toy set (Country of Origin: China)		Choking The set of rattles has small parts (knob of the rattle). A small child could put them into their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
A12/01140/24	Cyprus	Set of mini toy motorcycles (Country of Origin: China)		Choking The toys have small parts (wheels) which can easily detach. A small child may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
A12/01145/24	Ireland	Baby self-feeding pillow (Country of Origin: Unknown)		Choking During self-feeding, the baby is not able to control the flow of fluid. The fluid will continue to flow even if the baby is not swallowing. This may lead to choking. The product does not comply with the requirements of the General Product Safety Directive.	Removal of this product listing by the online marketplace
A12/01146/24	Ireland	Baby self-feeding pillow (Country of Origin: China)		Choking During self-feeding, the baby is not able to control the flow of fluid. The fluid will continue to flow even if the baby is not swallowing. This may lead to choking. The product does not comply with the requirements of the General Product Safety Directive.	Removal of this product listing by the online marketplace

A12/01158/24	Lithuania	Toy pushchair (Country of Origin: China)		Injuries, Suffocation The toy pushchair is unstable and protruding parts are not covered with protective caps. A child playing with the toy may become injured. Furthermore, the plastic bag of the packaging is too thin. If a child plays with it, the plastic can cover their mouth and nose, causing the child to suffocate. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
A12/01159/24	France	Plastic soother holder (Country of Origin: China)		Choking The soother holder does not have the required ventilation holes. Furthermore, the fastening of the soother holder can easily break and small parts can detach. Small children may put the soother holder and/or the detached small parts their mouth and choke. The product does not comply with the requirements of the General Product Safety Directive nor with European standard EN 12586.	Withdrawal of the product from the market
A12/01160/24	France	Soother holder (Country of Origin: China)		Choking The soother holder does not have the required ventilation holes. Small children may put the soother holder in their mouth and choke. The product does not comply with the requirements of the General Safety Directive nor with European standard EN 12586.	Recall of the product from end users
A12/01174/24	Cyprus	Set of toy vehicles (Country of Origin: China)		Choking The toy cars can easily break, resulting in small parts. Small children may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the relevant European standard EN 71-1.	Withdrawal of the product from the market

A12/01179/24	Ireland	Toy pottery wheel set (Country of Origin: China)		Chemical The product has an excessive concentration of lead (0.0013% by weight). Lead is harmful to human health, accumulates in the body, can cause developmental neurotoxicity and may affect breast-fed or unborn children. The product does not comply with the REACH Regulation nor with the requirements of the Toy Safety Directive.	Recall of the product from end users
A12/01181/24	Poland	Magnetic puzzle set (Country of Origin: China)		Injuries Small parts with high magnetic flux may detach from the toy. If a child swallows them, they could attract one another, causing intestinal blockage or perforation. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Destruction of the product
A12/01185/24	Poland	Plastic ball (Country of Origin: China)		Chemical The toy has an excessive amount of dibutyl phthalate (DBP) and diisobutyl phthalate (DIBP) (measured values up to 5.48% and 7.5% by weight, respectively). These phthalates may harm the health of children, possibly causing damage to their reproductive system. The product does not comply with the REACH Regulation.	Destruction of the product
A12/01201/24	Sweden	Water sprinkler for trampoline (Country of Origin: Unknown)		Injuries The product lacks instructions for use and the required warning label to warn against using the trampoline in wet conditions. Sprinklers make the trampoline wet, which increases the risk of injuries. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-14.	Recall of the product from end users

A12/01203/24	Italy	Soft toy (Country of Origin: Unknown)		Chemical The product has an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP) and dibutyl phthalate (DBP) (measured values up to 16.2% and 6.4% by weight, respectively). These phthalates may harm the health of children, possibly causing damage to their reproductive system. The product does not comply with the REACH Regulation.	Ban on the marketing of the product and any accompanying measures
A12/01204/24	Italy	Pencil case (Country of Origin: China)		Chemical The product has an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP) (measured value up to 5.2% by weight). This phthalate may harm the health of children, possibly causing damage to their reproductive system. The product does not comply with the REACH Regulation.	Ban on the marketing of the product and any accompanying measures
A12/01206/24	Poland	Pencil set (Country of Origin: China)		Chemical The pencil's plastic coating has an excessive amount of bis (2-ethylhexyl) phthalate (DEHP) (measured value up to 2.9% by weight). This phthalate may harm the health of children, possibly causing damage to their reproductive system. The product does not comply with the REACH Regulation.	Recall of the product from end users
A12/01207/24	Poland	Inflatable toy (Country of Origin: China)		Chemical The toy has an excessive amount of bis (2-ethylhexyl) phthalate (DEHP) (measured value up to 5.6% by weight). This phthalate may harm the health of children, possibly by causing damage to their reproductive system. The product does not comply with the REACH Regulation.	Destruction of the product

A12/01216/24	France	Playground with slide and swing (Country of Origin: Unknown)		Entrapment, Injuries, Strangulation The product lacks a barrier on the platform, which may lead to the child falling and sustaining injuries. Moreover, there are openings between the slide and the structure's support where a child's head can be entrapped. The gap between the swing and the platform of the slide is also too small. A child may place the swing on the slide and slip, causing risk of strangulation and injuries. The swing lacks fastening elements. If the swing is not fixed to the ground, it can tip onto a child, causing a risk of injury. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-8.	Removal of this product listing by the online marketplace
A12/01245/24	France	Teething ring (Country of Origin: China)		Choking A part of the teething ring may get stuck in the mouth of a small child who is unable to sit up unaided, causing choking. The product does not comply with the requirements of the Toy Safety Directive, nor with the European standard EN 71-1.	Withdrawal of the product from the market
A12/01250/24	Lithuania	Plastic doll (Country of Origin: China)		Chemical The plastic material of the doll has an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP) and dibutyl phthalate (DBP) (measured values up to 16% and 12% by weight, respectively). These phthalates may harm the health of children, causing possible damage to their reproductive system. The product does not comply with the REACH Regulation.	Withdrawal of the product from the market
A12/01251/24	Lithuania	Plastic doll (Country of Origin: China)		Chemical The plastic material of the doll has an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP) (measured value up to 10% by weight). This phthalate may harm the health of children, causing possible damage to their reproductive system. The product does not comply with the REACH Regulation.	Withdrawal of the product from the market

A12/01264/24	Poland	Toy gun set (Country of Origin: China)		Injuries The product can shoot improvised projectiles, such as a pencil, with excessive kinetic energy, which can cause injuries, especially to the face or the eyes. The product does not comply with the requirements of the Toy Safety Directive, nor with standard EN 71-1.	Warning consumers of the risks
A12/01286/24	Bulgaria	Baby bottle (Country of Origin: China)		Health risk / other The graduation on the bottle indicating the amount of liquid does not meet requirements. An incorrect dosage of liquids can lead to health risks for babies and small children. The product does not comply with the requirements of the General Product Safety Directive nor with the European standard EN 14350.	Withdrawal of the product from the market
A12/01290/24	Croatia	Soft toy (Country of Origin: China)		Choking The toy has small parts (eyes) which can easily detach. Small children may put them in their mouth and choke. Moreover, the fibrous stuffing material of the toy is easily accessible due to the weakness of certain seams. A small child may put the filling material in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive.	Ban on the marketing of the product and any accompanying measures
A12/01292/24	Poland	Inflatable ball (Country of Origin: China)		Chemical The toy has an excessive amount of diisobutyl phthalate (DIBP) (measured value up to 22.8% by weight). This phthalate may harm the health of children, causing possible damage to their reproductive system. The product does not comply with the REACH Regulation.	Warning consumers of the risks
A12/01303/24	Poland	Inflatable toy (Country of Origin: China)		Chemical The toy has an excessive amount of diisobutyl phthalate (DIBP) (measured value up to 5.8% by weight). This phthalate may harm the health of children, causing possible damage to their reproductive system. The product does not comply with the REACH Regulation.	Withdrawal of the product from the market

A12/01307/24	Poland	Babies' clothing (Country of Origin: India)		Choking Small parts (metal fasteners) can be easily detached from the product. A child may put them in their mouth and choke. The product does not comply with the safety requirements of the General Product Safety Directive.	Recall of the product from end users
A12/01308/24	Ireland	Babies' clothing (Country of Origin: India)		Choking Small parts (poppers) can be easily detached from the product. A small child may put them in their mouth and choke. The product does not comply with the requirements of General Product Safety Directive.	Withdrawal of the product from the market
A12/01333/24	Poland	Electric toy (Country of Origin: China)		Environment The electronic components of the product have an excessive concentration of lead (measured value up to 1.3% by weight). Lead poses a risk to the environment. The product does not comply with the requirements of the Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS 2 Directive).	Withdrawal of the product from the market
A12/01334/24	Poland	Electric toy (Country of Origin: China)		Environment The electronic components of the product have an excessive concentration of lead (Pb) (measured value up to 73% by weight) and cadmium (measured value up to 2.89%). Lead and cadmium pose a risk to the environment. The product does not comply with the requirements of the Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS 2 Directive).	Withdrawal of the product from the market
A12/01365/24	Romania	Magnetic toy (Country of Origin: Switzerland)		Injuries The toy is made of small magnets with a high magnetic flux. If a child swallows them, they could attract one another, causing intestinal blockage or perforation. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Stopping of sales

A12/01366/24	Romania	Magnetic toy set (Country of Origin: China)		Choking, Injuries The toy is made of small parts with a high magnetic flux. A child may put them in their mouth, which may lead to choking, or if swallowed, they could attract one another, causing intestinal blockage or perforation. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Stopping of sales
A12/01367/24	Romania	Magnetic toy (Country of Origin: Switzerland)		Choking, Injuries The toy is made of small parts with a high magnetic flux. A child may put them in their mouth, which may lead to choking, or if swallowed, they could attract one another, causing intestinal blockage or perforation. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Stopping of sales
A12/01368/24	Romania	Magnetic toy (Country of Origin: Switzerland)		Choking, Injuries The toy is made of small parts with a high magnetic flux. A child may put them in their mouth, which may lead to choking, or if swallowed, they could attract one another, causing intestinal blockage or perforation. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Stopping of sales
A12/01369/24	Romania	Magnetic toy (Country of Origin: Switzerland)		Choking, Injuries The toy is made of small parts with a high magnetic flux. A child may put them in their mouth, which may lead to choking, or if swallowed, they could attract one another, causing intestinal blockage or perforation. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Stopping of sales

A12/01370/24	Austria	Toy squid (Country of Origin: China)		Choking The toy contains small parts (eyes and tentacles) which can easily detach. A small child may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Recall of the product from end users
A12/01379/24	France	Soft toy (Country of Origin: China)		Choking The toy has small parts (right eye) which can easily detach. Small children may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Recall of the product from end users
A12/01380/24	Germany	Dot marker set (Country of Origin: China)		Chemical The toy material contains methylisothiazolinone (MI) (measured value up to 1.56 mg/kg). MI causes severe skin burns. The product has an excessive concentration of benzisothiazolinone (measured value up to 6.64 mg/kg). Benzisothiazolinone causes skin irritation and may cause an allergic skin reaction. The toy material contains methylchloroisothiazolinone (MCI) (measured value up to 5.22 mg/kg). MCI causes severe skin burns and may cause an allergic skin reaction. The product does not comply with the requirements of the Toy Safety Directive nor with the European standards EN 71-9.	Removal of this product listing by the online marketplace

A12/01382/24	Sweden	Inflatable ball (Country of Origin: China)		Chemical, Environment The plastic material of the product has an excessive concentration of diisobutyl phthalate (DIBP), dibutyl phthalate (DBP) and short-chain chlorinated paraffins (SCCPs) (measured values up to 7.5%, 14% and 2.7% by weight, respectively). These phthalates may harm the health of children, causing possible damage to their reproductive system. SCCPs persist in the environment, are toxic to aquatic organisms at low concentrations and bio-accumulate in wildlife and humans, posing a risk to human health and the environment. Prolonged exposure to them through the skin may cause cancer. The product does not comply with the REACH Regulation nor with the Persistent Organic Pollutants (POP) Regulation.	Ban on the marketing of the product and any accompanying measures
A12/01387/24	Ireland	Teether with clip (Country of Origin: China)		Choking The product has a small part (plastic clip) which easily detaches. A small child could put it in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standards EN 12586 and EN 71-1.	Recall of the product from end users
A12/01389/24	Ireland	Soother holder (Country of Origin: China)		Choking Some soother holders are not correctly welded. As a consequence, small parts can become loose. A small child could put them into their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standards EN 12586 and EN 71-1.	Recall of the product from end users

A12/01400/24	The Netherlands	Soother holder (Country of Origin: China)		Choking The wooden beads can break apart, resulting in small parts. A small child may put them in their mouth and choke. The product does not comply with the requirements of the General Product Safety Directive nor with European standard EN 12586.	Stopping of sales
A12/01405/24	Sweden	Flying ball toy (Country of Origin: China)		Environment The solders in the product have an excessive concentration of lead (measured value up to 43% by weight). Lead poses a risk to the environment. The product does not comply with the requirements of the Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS 2 Directive).	Import rejected at border
A12/01416/24	Italy	Toy ball with Pokemon (Country of Origin: Unknown)		Chemical The product has an excessive concentration of bis(2-ethylhexyl) phthalate (DEHP) and diisobutyl phthalate (DIBP) (measured values up to 1.4% and 17% by weight, respectively). These phthalates may harm the health of children, causing possibly damage to their reproductive system. The product does not comply with the REACH Regulation.	Ban on the marketing of the product and any accompanying measures
A12/01418/24	The Netherlands	Wooden toy (Country of Origin: France)		Choking Parts of the toy can easily break, resulting in small parts. Small children may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
A12/01419/24	The Netherlands	Bead track (Country of Origin: The Netherlands)		Choking Parts of the toy (beads) can easily break, resulting in small parts. Small children may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market

A12/01423/24	Lithuania	Plastic doll (Country of Origin: China)		Chemical The plastic material of the doll contains an excessive amount of bis(2-ethylhexyl) phthalate (DEHP) (measured values up to 17% by weight). This phthalate may harm the health of children by causing possible damage to their reproductive system. The product does not comply with the REACH Regulation.	Withdrawal of the product from the market
A12/01425/24	France	Children's balance bike (Country of Origin: China)		Injuries Children can be injured as a result of the failure of the braking system. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Withdrawal of the product from the market
A12/01429/24	France	Fancy-dress costume (Country of Origin: China)		Burns The hair of the costume is highly flammable. A child risks burns to the head if it catches fire. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-2.	Recall of the product from end users
A12/01432/24	France	Fancy-dress accessories (Country of Origin: China)		Chemical The plastic of the product has an excessive concentration of polycyclic aromatic hydrocarbons (PAHs), notably Benzo(a)anthracene (measured value up to 1.18 mg/kg). These PAHs may cause cancer. The product does not comply with the REACH Regulation.	Recall of the product from end users
A12/01435/24	Sweden	Trampoline bungee set (Country of Origin: Unknown)		Injuries, Strangulation The harness does not correctly hold the user who may slip out and fall. Moreover, the user can become entangled in the elastic band, causing strangulation and injuries if they trip and fall. Bystanders can also be hurt by the spinning handle. The product does not comply with the requirements of the General Product Safety Directive.	Recall of the product from end users

A12/01436/24	France	Toy kitchen set (Country of Origin: China)		Choking The toy includes pieces with easily detachable parts (end of the carrot and end of the potato). A small child may put these in their mouth and choke. The toy does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Recall of the product from end users
A12/01437/24	Austria	Toy car with sweets (Country of Origin: China)		Choking The toy has easily detachable small parts (head and wheels). A small child may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Recall of the product from end users
A12/01439/24	Austria	Toy airplane with sweets (Country of Origin: China)		Choking The toy has easily detachable small parts (pull cord cap). A small child may put them in their mouth and choke. The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-1.	Recall of the product from end users
A12/01446/24	Czechia	Inflatable ball (Country of Origin: Unknown)		Chemical The plastic material of the product has an excessive concentration of diisobutyl phthalate (DIBP) and dibutyl phthalate (DBP) (measured values up to 39% and 0.30% by weight, respectively). These phthalates may harm the health of children, causing possible damage to their reproductive system. The product does not comply with the REACH Regulation.	Destruction of the product
A12/01454/24	Bulgaria	Baby bottle (Country of Origin: China)		Choking, Cuts The teat breaks easily, resulting in small parts. A small child can swallow them and may choke. The bottle can break easily, creating sharp edges which may cause cuts. The product does not comply with the requirements of the General Product Safety Directive nor with the European standard EN 14350.	Withdrawal of the product from the market

A12/01463/24	The Netherlands	Baby walker (Country of Origin: Hong Kong)		Injuries The baby walker has no proper protection against falls from stairs, and can consequently fall down stairs during use, leading to injuries to a child. The product does not comply with the requirements of the General Product Safety Directive nor with the European standard EN 1273.	Withdrawal of the product from the market
A12/01464/24	Germany	Soft ball (Country of Origin: Italy)		Chemical The product has an excessive concentration of the aromatic amine 4-methyl-m-phenylenediamine (measured value up to 0.0178% by weight). 4-methyl-m-phenylenediamine is a skin sensitiser, which may cause cancer and might induce mutations and affect fertility. The product does not comply with the CLP Regulation nor with the requirements of the Toy Safety Directive.	Recall of the product from end users
INFO/00072/24	France	Changing table (Country of Origin: Spain)		Entrapment When the changing table is positioned horizontally under the bath unit, there is a risk of the child's head becoming entrapped between the flap of the changing table and the bath unit. The product does not comply with the requirements of the General Product Safety Directive.	Marking the product with appropriate warnings of the risks

Safety Gate: the EU rapid alert system for dangerous non-food products

“Safety Gate”, the EU rapid alert system (formerly known as “RAPEX”), enables the rapid exchange of information between **31 European countries** and the European Commission on non-food dangerous products found on the market posing a risk to the health and safety of consumers.

A weekly overview of the alerts on those products is published in English for free on <https://ec.europa.eu/safety-gate-alerts/screen/webReport#weeklyReports>. The measures taken in the notifying country in order to restrict such products’ marketing or use can be ordered by national authorities (“compulsory measures”) or be taken directly by producers and distributors (“voluntary measures”).

The official contact points of the Member and EFTA-EEA States provide the information published in these weekly overviews. Under the terms of Annex II.10 of the General Product Safety Directive (**2001/95/EC**) responsibility for the information provided lies with the notifying party. The Commission does not take any responsibility for the accuracy of the information provided.

Recall Summary – US Toys / Children’s Products

CPSC Recall List (May 2024)

Recall No.	Notifying Country	Product	Product Photo	Hazard / Risk	Remedy
21-159	USA	Children’s Robes (Country of Origin: China)		Burn Hazard Children’s Robes Sold Exclusively on Amazon.com Recalled Due to Violation of Federal Flammability Standard and Burn Hazard; Manufactured by SIORO The children’s robes fail to meet the federal flammability standards for children’s sleepwear, posing a risk of burn injuries to children.	Consumers should immediately stop using the recalled garments and contact SIORO for instructions on returning the garments with free shipping to receive a full refund.
24-215	USA	Youth Sipper Bottles (Country of Origin: China)		Choking Hazard Igloo Products Recalls Youth Sipper Bottles Due to Choking Hazard This recall involves the Igloo 12 oz. Youth Sipper Bottle. “IGLOO” is printed on the side of the stainless-steel bottle. The bottle’s lid has a silicone cover on the sipper. They were sold in various colors, including: pink top and purple body; purple top and pink body; blue top and green body; and green top and blue body. The silicone cover on the sipper can detach while in use, posing a choking hazard to children.	Consumers should immediately take the recalled bottles away from children, stop using them, and contact Igloo to receive a replacement bottle or refund. Consumers should destroy the silicone spout by removing the silicone spout and cutting it into two separate pieces down the center. Consumers should then take a photo of the spout in two separate pieces, then discard the two pieces in the trash.

24-216	USA	<p>SKIMS Children’s Pajama Sets</p> <p>(Country of Origin: Philippines)</p>		<p>Burn Hazard</p> <p>Skims Body Recalls SKIMS Children’s Pajama Sets Due to Burn Hazard; Violation of Federal Regulations for Children’s Sleepwear; Sold Exclusively by Skims Body</p> <p>The children’s pajama sets fail to meet the flammability regulations for children’s sleepwear, posing a risk of burn injuries to children.</p>	<p>Consumers should immediately take the recalled pajamas away from children, stop using them, and contact SKIMS for a full refund.</p> <p>Consumers will be asked to destroy the garment by cutting the top and bottom in half, and uploading a photo of the destroyed garments to: https://www.recallrtr.com/pajamasets. Upon receipt of the photo, consumers will be issued a full refund of the purchase price, plus a credit toward a future SKIMS purchase. SKIMS is contacting all known purchasers directly.</p>
24-217	USA	<p>Mill Valley Jr. Six-drawer Youth Dressers</p> <p>(Country of Origin: Vietnam)</p>		<p>Over and Entrapment Hazards</p> <p>Children’s Dressers Sold Exclusively at Rooms To Go Recalled Due to Tip-Over and Entrapment Hazards; Violation of Federal Regulation for Clothing Storage Units; Imported by LFN Limited</p> <p>The recalled dressers are unstable if they are not properly anchored to the wall, posing serious tip-over and entrapment hazards that can result in injuries or death to children. The dressers violate the performance requirements of the STURDY Act.</p>	<p>Consumers should stop using the dressers immediately, keep children away from them, and contact Rooms To Go for a free replacement dresser. Rooms To Go will schedule a free delivery of the replacement, and remove the recalled dresser. Rooms To Go is contacting all known purchasers directly.</p>

CPSC

The United States Consumer Product Safety Commission (CPSC) is an independent agency of the United States Government. To provide better service in alerting the American people to unsafe, hazardous or defective products, a “one stop shop” for U.S. Government recalls, <http://www.recalls.gov>, has been created. Members of the public may report unsafe products to CPSC by using the platform.

The recall list is divided into seven categories: Consumer Products, Motor Vehicles, Boats, Food, Medicine, Cosmetics and Environmental Products. Generally, the recall is conducted voluntarily by the company under CPSC’s Fast Track Recall program. Fast Track recalls are initiated by firms who are committed to working with CPSC to quickly announce the recall and remedy to protect consumers.

Recall Summary – Australia Toys / Children’s Products

Australian Product Safety System

The Australian product safety system is set up to maximize the safety of goods through the cooperation of consumers, businesses and agencies. This policy sets out the principles adopted by the Australian Competition and Consumer Commission (ACCC) for prioritizing and addressing product safety risks.

Under the Australian Consumer Law, a responsible Minister can order a compulsory recall when there are hazards on the products. A voluntary recall could be conducted to remove the product from the marketplace when the suppliers become aware of unsafe or defective products.

The ACCC administers a national recalls system for recalls of specific and general consumer products, and publishes all product recalls on the website <https://www.productsafety.gov.au/recalls>.

STC (Hong Kong Standards and Testing Centre) is a not-for-profit, independent testing, inspection and certification organization. With a global network of ISO/IEC 17025 accredited testing laboratories and over 60 years of experience in consumer product testing, we can meet your conformity assessment needs with highly efficient and reliable service. Our testing scope and capabilities related to toys and children's products include but are not limited to:

EU Requirements

- EN 71
- Phthalates (EC) no. 1907/2006
- Nickel Release (EC) no. 1907/2006
