

1. China Issued an Announcement regarding the Orderly Development for the Export of Medical Materials (No.5 of 2020)

From April 1, 2020, Chinese enterprises

export novel coronavirus detection

reagents, medical masks, medical

protective clothing, ventilators, and infrared thermometers must provide written or electronic

statements when they declare to the Customs, promising that the exported products have obtained

China Medical Device Product Registration Certificate and complied with the quality standards of the

importing countries (regions). The Customs shall check the official Medical Device Product

Registration Certificate approved by the National Medical Products Administration and release the

products.

STC provides mask testing and product consultation, if you have any enquiries, please email

hkstc@stc.group.

other data, and based on the opinions of relevant units, conscientiously analyze and study new problems reflected in the work of epidemic prevention and adhere to problem-oriented. Focus on the low-pass rate of supervision and random inspection, and the problems reflected in all aspects are more prominent, and it involved major quality and safety or the relevant national policy documents required key supervision of industrial products. Therefore, "the National Catalogue for the Supervision and Control of Quality and Safety of Key Industrial Products (2020 Edition)" (hereinafter referred to as the "Catalog") has been formulated. 267 products were included in the 2020 edition of the "Key Product Catalog". Merchants that were listed in key cataloged products should pay more attention to product quality and avoid the failure in the random inspections.
